Information to Contributors

Journal of Systemics, Cybernetics and Informatics: JSCI
(http://www.iiisci.org/Journal/SCI)

Submission of Manuscripts for Review

Papers for review should be submitted via the web form included in the web site of the electronic version of JSCI. A contact author name, e-mails, phone number, etc. should also be sent via the web form. If the paper has co-authors, their respective names would be added in the camera ready version, if the paper is accepted for publication. All papers should contain at least a sufficiently informative abstract of about 100-200 words (where nature and significance of the paper should clearly be stated), keywords, introduction of the paper and bibliography. Papers should be written in English. Authors whose English language is not their own are certainly requested to have their manuscripts checked (or co-authored) by an English native speaker, for linguistic correctness before submission. Editorial decisions on acceptance or otherwise will be taken normally within three months of receipt of a paper. In some cases as, for example, where more reviewers will be required, because there are significant differences in the evaluations of the initially assigned reviewers, editorial decisions may take up to six months.

JSCI manuscripts maximum length is 5000 words. The final camera-ready versions submitted for publication of accepted papers have a maximum length of 8 single-spaced double-column pages, according to the format required for JSCI. For members of the International Institute of Informatics and Systemics (IIIS, www.iiis.org) the Article Processing Charge (APC) for publishing the accepted submissions is USA $ 250. Any page or fraction thereof surpassing this limit is charged USA $50. The APC for non-members is USA $ 450, and any additional page or fraction surpassing the limit will be charged USA $80. Instructions to authors whose papers have been accepted for publication will be sent to them simultaneously with the acceptance notice. Special issues of the Journal may have different publishing polices. They might also have different processing charge, which will be announced with the respective call for papers.

Citations of web pages

As cited URLs tend to disappear months or years after citing online material, authors submitting articles to JSCI are encouraged to use http://www.webcitation.org to permanently archive all cited web pages and websites, and to cite the archived copy in addition to the original link. This is recommended for submissions made for their respective evaluation and strongly recommended for the final versions of the accepted articles. This would take about 20 second per each cited web page. Please go to www.webcitation.org (or more directly to http://www.webcitation.org/archive.php) and enter the URL you want to cite. The system will take a "snapshot" of the webpage or online document (e.g. PDF) so that it will remain available for future readers. WebCite will also give you detailed instructions on how to cite the web reference. Electronic journal articles or other material do not have to be archived with WebCite if they carry a DOI, but all other material which might disappear in the future should be archived first by the citing author.
Example for Citing a Web Reference

Copyright Information

A non-exclusive copyright should be granted to the publisher before the article can be published. Authors can re-publish their respective article by just citing the original publication in JSCI. It is understood that published articles are not to be submitted and/or re-published in other journals without alerting the respective editor about the previous publication and referencing the publication in JSCI.

The copyright granted to the publisher will allow the potential publication of the respective articles via other means: new printings, re-edition of the respective issue, multiple author books, group blogs related to JSCI articles, etc.

It is understood that the content of papers submitted to for their respective review have been neither submitted to other publication, nor published in, another journal. Simultaneous submission to *JSCI* and other publication(s) is considered a serious breach of ethics and, if it is detected, will have the effect of immediate rejection of the submission, without excluding other actions that might be taken.

Papers previously published in preprints, internal publications, proceedings, etc. are eligible for their reviews by JSCI, as long as they have gone through revisions, the editor-in-chief has been explicitly informed and possible copyright clearances have been obtained by the paper author.

The author is responsible for obtaining corporate and security clearances and copyright releases prior to submitting material for its consideration or reviewing. It is *JSCI*’s policy to assume all clearances are granted and possible copyrights are transferred when a paper is submitted for its review.

Subscription details for on demand printed subscriptions

The journal is basically an electronic one, but prepared to be a hybrid publication. Consequently, printed (hard copies) might be produced on demand. In such a case, the rates are as follows.

Subscription rates per volume (6 issues per volume):
- Institutional rates: USA $240 for USA/Canada and USA $540 for the rest of the world
- Personal rates: USA $120 for USA/Canada and USA $180 for the rest of the world

Back issues have the same rate.

Rates for specific issues are as follows

Institutional rates: USA $40 plus shipping and handling
Personal rates: USA $25 plus shipping and handling
Subscriptions inquiries, and address changes or corrections, may be made via e-mail: sci-journal@iiis.org or via Fax: +1 (407) 656-3561

Disclaimer

The Editors and the Publisher of the International Journal of Systemics, Cybernetics and Informatics, are not responsible for the scientific content, opinions, and statements of the authors of accepted papers. Published papers might be removed, with no refund for the respective Article Processing Fee, if non-ethical behavior is identified after the article has been published. Examples of non-ethical behavior are plagiarism, scientific fraud, copyright or patent infringement, and any other scientific, academic, or professional misconduct.
